

pharmaceutical

Scheck has performed critical piping projects and delivered quality instrumentation automation and control systems to sensitive areas of product manufacturing and development, including advance sterilization technologies, bulk product development, animal health and welfare, as well as research and development. We have assisted clients with meeting strict Food and Drug Administration requirements along with their own internal audits, and our involvement with advanced sterilization technologies has helped major manufacturers produce products in an environmentally controlled environment with minimal human contact. Pharmacia & Upjohn, Abbott Laboratories, Pfizer, Parke-Davis, Amersham Health, Aventis, and Proctor and Gamble are a few of the names in the pharmaceutical industry who have chosen Scheck to tackle their critical needs. When your engineering, production, and technical staff need assistance with equipment validation, both installation and operational qualification, and routine preventive and predictive maintenance programs, call on an experienced leader – call on Scheck Industries.

“Scheck has consistently collaborated with Aventis Engineering to implement process improvements in a timely manner with excellent quality.”

–John Valley, API Project Manager, Aventis
